# Changing your country store - iOS

If you're having trouble with app / music purchases on your iPhone or iPad, the problem might be due to the country region settings. For instance, you may have a credit card with an address in one country but your iPhone might have been set up in another country so the regions would be different.

Step 1: Go to Settings

Step 2: Scroll down and tap on 'iTunes & App Purchases'

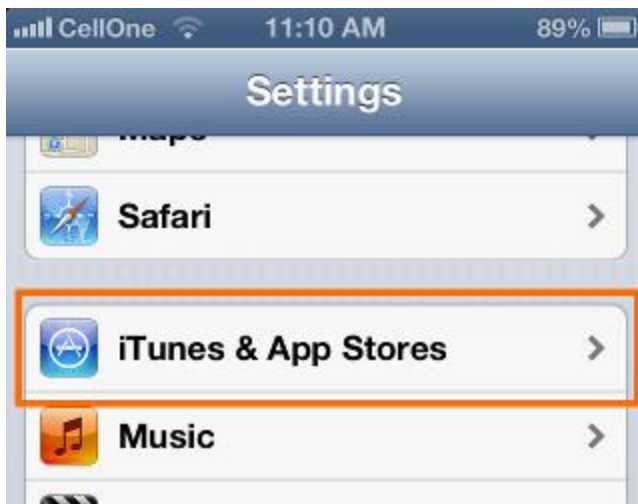

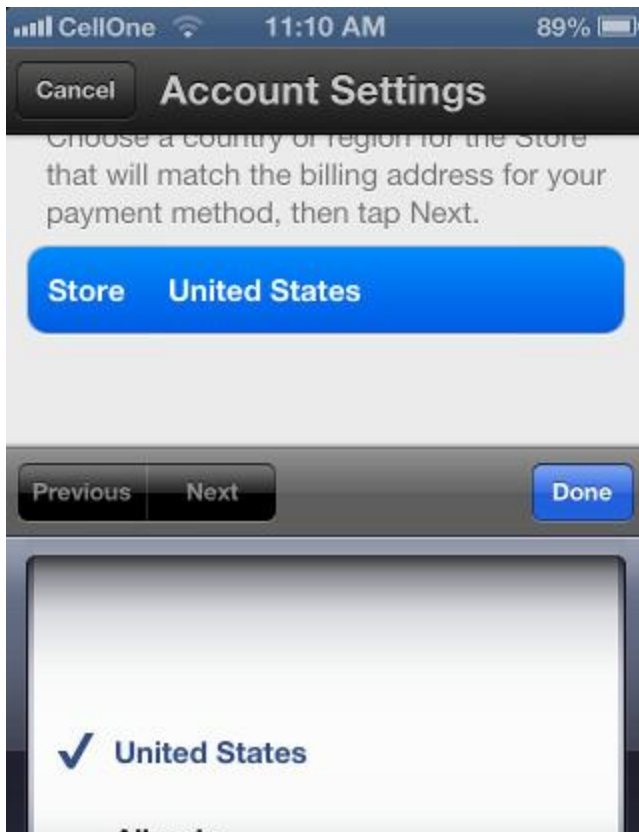

Step 4: Tap 'View Apple ID'

Step 5: Tap on 'Country Region'

Step 6: In the next screen tap 'Change Country or Region'

Step 7: Now, select the country from the list

Step 8: When the iTunes & App Store Terms of Service page is shown, tap on "Agree"

Step 9: Once done, you will have to review your payment method and details. This is where your card's address will be cross-checked with the given country region and address. Make sure you provide a bank account/card detail that has the chosen country in its address. Click on 'Next' and you're done. You'll have to provide the correct ZIP and other address details.
