

User agreement sign off

The user agreement is signed by all participants who participate in the Universal App Program. A person with authority to sign on behalf of your national society will need to sign the user agreement before the app goes live in your country's app store.

The CMS allows for a user to go into the system, review the agreement and sign electronically. If needed, your point of contact at the GDCP can create a separate username for that person.

An English copy of the agreement is available. It is the responsibility of the national society to translate the document at their own will. Steps to sign the agreement are as follow:

In CMS Console page, go to User Agreement

User agreement sign off

Review and sign agreement electronically: Click the 'I agree box' and then the green sign button.

The screenshot shows a web browser window with the URL <https://gdpc.3sidedcube.com/apps/09/user-agreement>. The page title is "Universal Hazard Application Program Agreement".
