**alpha**  
multi purpose tent

# shelter

The Alpha is designed for operations in warm climates, designed with a self-supported aluminium-hinged structure facilitating a rapid erection and a most robust construction. Detachable gables opens for lengthwise interconnection and accordingly extended utilisation. Inner linings are available, as well as tailor-made ground sheets.

The Alpha has been in service in extreme climates like in the UAE, and in more diversified climates like the Balkans. This multi purpose tent has served as the sole shelter in camps for 10.000 people for the purposes of accommodation, kitchen, offices, dining hall, communication center and recreation hall.

The experiences gained from extensive use in a variety of weather conditions and different operational tasks have created an improved focus on details and user preferences. Together with the field personnel and users we have created solutions that meet the requirements where they are formed – that's the way we work.

A diversity of accessories are available for the Alpha, such as floor tiles, field quality lighting, separation walls, inner cabins, field beds, lockers and climate control systems.

ROFI Industrier as represents more than 60 years of experience within the textile industry. A comprehensive integration with our suppliers and partners enable us to meet the requirements for progressive development, system solutions and a stock-hold of selected items. We continuously maintain our certificate covering quality assurance/quality control.
