

## Call for Participation 2018 CAP Implementation Workshop

The 2018 Common Alerting Protocol (CAP) Implementation Workshop, will be 31 October and 1 November, in Hong Kong, China, at [Hong Kong Observatory \(HKO\)](#). Documents pertaining to the Workshop events can be found at the 2018 CAP Implementation Workshop [website](#).

CAP, designated as International Telecommunication Union (ITU) Recommendation X.1303, is broadly recognized internationally as the key standard for societies to achieve all-hazards, all-media public alerting for emergencies.

CAP Implementation Workshops provide a forum for implementers of CAP and associated organizations to discuss how best to expand adoption of the CAP standard and to share practices among users of the standard. There is no charge to participate and anyone interested in emergency alerting is welcome: managers, technical staff, media, etc., including commercial organizations, governments, and non-governmental organizations.

If you have CAP implementation experiences or insights to share, please let the Program Committee know that you want to give one of the presentations. As usual, presentations will be limited to 20 minutes each.

The 2018 CAP Implementation Workshop is co-sponsored by the International Association of Emergency Managers (IAEM), the International Federation of Red Cross and Red Crescent Societies (IFRC), ITU, OASIS (the international standards organization that actually maintains the CAP standard), and the World Meteorological Organization (WMO).

Please share this note with any discussions lists and individuals interested in emergency alerting.

The Program Committee of the 2018 CAP Implementation Workshop:

HKO	Armstrong Cheng
IAEM	Beth Armstrong
IFRC	Jessica Robbins
ITU	Comas Zavazava
OASIS	Elysa Jones
WMO	Miriam Andrioli
