

Feature Graphic Banners

Google Play requires a feature graphic to be submitted as part of their metadata. If your country has a Google Play store, then you will be expected to prepare a feature graphic or 'banner' for your app. Contact the GDPC for assistance in creating the banner.

App banner specifications:

- Dimensions: 1024x500 pixels
- Background *cannot* be transparent
- Squared corners (not rounded)

The banner may include you app's icon, the name of your app (i.e. 'First Aid'), and an app slogan (i.e. *First Aid in your pocket*). Below is the GDPC's generic banner.

Below are some Banner examples as used by other societies. These examples can be used as a model, but always try to be original.
