

Icon Guide

Like any app your First Aid app will have a unique icon on iOS and Android phones and devices. Your national society is responsible for creating its own icon. Before you submit it to the GDPC, please note the following mandatory technical specifications. The icon must;

- be **1024 x 1024** pixels,
- have **square corners**,
- have **no transparency** in the background,
- be in **png format**.

If you are unable to create your own icon, or require assistance, then please contact the GDPC. We will be happy to have a consultation with you to offer any assistance that we can.

Examples and tips:

- a. Remember that the icon will appear on the screen of the Android or iOS device in which it is installed. Icons with color and large images display the best. Here are some good examples:

- b. You may include some large text. The size of text should be taken into consideration. Larger text will be easily visible for the icon installed on the phone or tablet screen.

- c. Try not to include small text in your icon. It will be nearly impossible to read on a phone or tablet screen. Examples are:

You may view examples of First Aid icons by following this link:

(<https://drive.google.com/folderview?id=0B6qV5otjq7x6RmpGME1MTkpVb1E&usp=sharing>). You are free to download these icons and use them as a basis or guidance for creating your own unique icon.
