

What happens when a major disaster strikes?

Regardless of the nature of the disaster, the outcomes are largely the same:

- ✓ Local responders become rapidly overwhelmed.
- ✓ Wide scale, sustained power loss.
- ✓ Communication infrastructure failure.
- ✓ Drinking water supply is absent or contaminated.
- ✓ Human waste removal infrastructure fails.
- ✓ Medical facilities become rapidly overloaded.
- ✓ Widespread reliance on state/federal/international responders.
- ✓ Demand for rapid aid is beyond combined response capabilities.

What do we do?

Our company has responded to major disasters across the nation and indeed the globe.

Our mission?

Help you to prepare to face things we hope you never see
