

# How to Use the Data Visualisation Examples

The **Data Visualisation Examples [Handout 6]** are provided here specifically for use with the **Data Viz Gallery [Exercise 7]** but may be useful in other data visualization sessions/workshops as examples or inspiration. If you want to post them on the wall, it is optimal to print on A3 or Tabloid size. If you'd like them to be useful for small group work, A4 or 8.5 by 11 will work well.
